

Figure 5 in the amended specification. Totally 6 figures were re-numbered from Figure 1-6.

## **2. Specification**

*The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.*

**Amendment:** The specification has been re-written by deleting the content of phase change memory to focus on the programmable metallization cell memory (PMCm). The new specification is shorter and more concise.

*The title of the invention is not descriptive. A new title required that is clearly indicative of the invention to which the claims are directed.*

**Amendment:** the title on the invention was changed to  
**"Programmable Metallization Cell Memory with Multiple Extra-Small Resistive elements"**

## **3. Claims:**
